DETAILED ACTION

1. The information disclosure statement (IDS) submitted on 8/16/02 has been considered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spielvogel et al. (5,286,853) in view of Vallana et al. (EP 0 857 470 A2). Spielvogel et al. disclose a stable atomic element being ¹⁵⁷Gd for a neutron capture therapy as claimed. Although, Spielvogel et al. do not disclose a stent as claimed for delivering the stable atomic element to a treated site, attention is directed to the Vallana et al. reference which disclose a stent as claimed (figures 1-5) for delivering a stable atomic element to a treated site. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the stent as disclosed by Vallana et al. in order to delivering the stable atomic element of Spielvogel et al. to a treated site.
